

OUR PRODUCTS

Glides: Our glide baits are handmade from wood and receive two layers of wood sealer and TrueCoat epoxy before the first paint layer is applied. We then add two additional coats of epoxy for enhanced durability. Each bait features O'Shaugnessy Treble Short 4X Hooks and #6 extra heavy Rosco split rings, along with custom Dead Meat eyes. They are slow to sink, highly responsive, and work best with a non-swivel steel leader.

Cranky Suckers: This crankbait weighs 3.5 oz and measures 8 inches long (tail included). It has a slow-sinking design and performs well with a steady retrieve or when twitched.

Heat Seekers: Our Heat Seekers are handmade from wood and receive two layers of wood sealer and TrueCoat epoxy before the first paint layer is applied. We then add two additional coats of epoxy for enhanced durability. Each bait features O'Shaugnessy Treble Short 4X Hooks and #6 extra heavy Rosco split rings, along with custom Dead Meat eyes. About 10 inches in length, they are best used with slow pulls and long pauses.

Game Over Jigs: Our swim jigs feature a classic design with a resin head, an 8/0 jig hook, and an 8/0 trailer hook. The skirts are hand-tied and reinforced with zip ties. Weighing about 3 ounces and measuring 10 inches in length, they are slow-sinking and designed to be weedless, making them ideal for various fishing conditions.
